## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 11 is rejected under 35 U.S.C. 102(b) as being anticipated by Cheng et al. (US 6,007,390).

Cheng et al. disclose an electric contact (10) comprising:

a metallic substrate (14);

a contact layer (16) which is applied to the metallic substrate, wherein the contact layer includes a structure layer (18).

### *Claim Rejections - 35 USC § 103*

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 12-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cheng et al. (US 6,007,390).

Art Unit: 2833

Cheng et al. substantially disclosed the claimed invention except for the material of the dispersed particles being as of an oil-capsule, or silver, or noble metal, or aluminum oxide, etc. as claimed.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide a specific material as claimed into the contact layer, since it has been held that to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.
